

## **Orbus “Building Communities For The Future”**

**Orbus programs involve local businesses and professionals that are clearly committed to local, regional, national and global communities. They participate by supporting non-profit and charitable programs that fit Orbus philosophy. They know that businesses gain from giving back to their communities. We believe we can make a better future for our communities by acting together. These community minded businesses have organized into Orbus Business Networks Chapters to work to better their communities, to give back and to help grow their own businesses at the same time - a win/win scenario for all.**

**Making the future better is a tall order, but we have to start somewhere and for us that means working at all levels, but recognizing that we will contribute as our financial and human resources allow. To make it work we administer it for all of you, and provide the systems to help make you and your local Orbus chapters succeed in bettering your community.**

**On a regional, national and global basis, more can be done in a unified basis. That is part of the Orbus initiative. There are so many needs and good causes in the world and we work to support certain areas under this initiative.**

**Guidelines are determined by Orbus each year, but the areas we support are for local communities, children, youth, education, amateur sports, arts & culture and elders. “Children” (youth) are our future and our elder needs sometimes become marginalized. In both we work to build “great citizenship” and support our communities by doing so. As with the knowledge of our elders we also believe in life long learning, as that is how we stay in tune with the world around us and stay young in our hearts.**

**In all of this we realize it is “one step at a time” but, as responsible citizens we are “doing” something that will, no matter how small a part it may play, it will help build communities for the future. Orbus Members, simply put, are people doing their part to better the world community and the community around us.**
